

Interim Environmental Leadership, Rehabilitation and Mine Closure Support

Experienced, site-capable support when mining operations require temporary coverage, additional senior capacity or delivery assistance.

Practical senior capability across the mining lifecycle

NG Mining Environmental provides short-term environmental leadership, rehabilitation, closure and senior project support. Led by Environmental Engineer and mining professional Nathan Goodwin, the business brings more than 25 years of experience across Australia, Africa and Southeast Asia - from project development and construction through operations, care and maintenance, rehabilitation and closure.

Interim Environmental Leadership

Temporary Environment Manager, Superintendent or senior advisory coverage during leave, recruitment, organisational change or peak workload.

- Leave and vacancy coverage
- Environmental function stabilisation
- Team, contractor and regulator oversight
- Care-and-maintenance and early restart support

Rehabilitation and Closure Delivery

Practical leadership and client-side support for progressive and legacy rehabilitation, closure planning and rehabilitation liability management.

- Rehabilitation campaign oversight
- Contractor, mining and survey coordination
- Closure costing and liability reviews
- Specialist closure-study coordination

Approvals, Compliance and Readiness

Environmental approvals, assurance and management-system support across project development, operational change and transition into operations.

- Approval strategy and submissions
- Compliance reviews and audit closeout
- Management systems and operational readiness
- IFC and lender requirement integration

Projects, Due Diligence and Senior Capacity

Defined work packages and senior project support for mining companies, investors and consultancies.

- Environmental due diligence
- Environmental and closure liability reviews
- Senior workstream and consultant coordination
- Independent review and quality assurance

Representative experience

- Led teams responsible for progressive rehabilitation programs covering up to approximately 1,000 hectares annually.
- Developed and reviewed closure costs, financial provisioning and specialist closure studies at Tanami Operations.
- Maintained environmental governance through voluntary administration and care and maintenance.
- Managed ESIA baseline studies against Ghanaian requirements and IFC Performance Standards.

Engagement options

- Short-term FIFO assignments
- Leave-relief coverage
- Fixed-term contracts
- Defined work packages
- Remote and blended support
- Associate consulting
